

EV home charging solution

Easy, simple, turnkey home charging installation solution

Element, in partnership with Qmerit, a leader in green energy transformation, offers Element clients seamless end-to-end installation and support of EV chargers at individual residences.

With the evolving transition to EVs, determining and rolling out the right EV infrastructure can be tricky and time consuming for fleets. Element's home charging solution offers you a safe, scalable and turnkey solution to address the need for at-home EV charging.

Element's home charging solution does all the heavy lifting making it easier for you to implement and simple for drivers to utilize. The platform:

- Schedules and tracks EV home charger installations to ensure chargers are available prior to EV delivery
- Minimizes driver disruptions through fast, convenient EV charger installation
- Utilizes a network of licensed, accredited and insured electricians to ensure the work is done correctly and safely

Our home charging solution helps you avoid costly mistakes and deliver a positive driver experience, all while advancing the sustainability of your fleet.

We'll help you
confidently navigate
your path forward
