

Supplier Cleaning and Disinfecting Protocol

Each of the suppliers listed below are performing enhanced cleaning / disinfecting procedures which may include but are not limited to:

- Following CDC or other government guidelines depending on country of operations
- Practicing social distancing when interacting with clients / drivers
- Cleaning / disinfecting vehicle high touch points after performing services on vehicles
- Covering vehicle touch points and having vehicle technicians wear gloves
- Providing contact-free vehicle drop off and pick up as applicable
- Providing enhanced facility cleaning, disinfecting, and social distancing measures in facility spaces where clients may be dropping off, picking up, or waiting for vehicle services as applicable

This list is for informational purposes only and represents only those suppliers that communicated to Element they have implemented additional cleaning procedures for their operations. Element does not represent or warrant that the information on this list is complete or free from errors or omission.

If you are looking for a more intensive, certified decontamination service, Element is providing a vehicle decontamination service to manage COVID-19 concerns for clients whom have either safety and precautionary considerations for their fleet and want to invest in the health of their employees. This service is not standard vehicle cleaning. It is a multi-step process utilizing EPA registered products for documented 'Emerging Pathogens' (the current coronavirus classification) resulting in 99.9% level of sanitization in the vehicle. Our provider conducts pre- and post-ATP testing and will provide test results following job completion to demonstrate the effectiveness of the service. A document will also be attached to the vehicle window certifying the vehicle was disinfected and is signed by the technician who performed the work.
