

Title & Registration

- Our internal Title & Registration teams are fully operational and working closely with state and local jurisdictions to continue processing transactions, where capabilities still exist.
- Since every state and local jurisdiction is operating on a different schedule, we will continue to send automated pre-requisite letters to our drivers and clients informing them of what is required to process their registration renewal or title transaction.
- We understand that there may be limitations in fulfilling certain required pre-requisites due to a variety of reasons such as:
 - State & jurisdiction testing station closures
 - Client office closures
 - Employee self-quarantining
- We ask that if there are circumstances or state & jurisdiction closures preventing drivers from obtaining these requirements, that drivers simply complete at their earliest convenience, once these locations re-open.
- The latest status of DMV closures as well as title & registration extensions granted, can be found [here](#).
- For Registration Renewals: We will continue to provide Power of Attorney's (POA) to drivers to that they have an option to renew their on their own, once state & jurisdictions re-open. Element is also committed to providing assistance to any drivers who submit pre-requisites direct to our teams.
