OPERATIONAL HIGHLIGHTS

1.1 Originations (excluding Armada)

Q2 2024 originations grew 4.6% from Q2 2023 to a record level as OEM production has substantially recovered from earlier supply chain constraints.

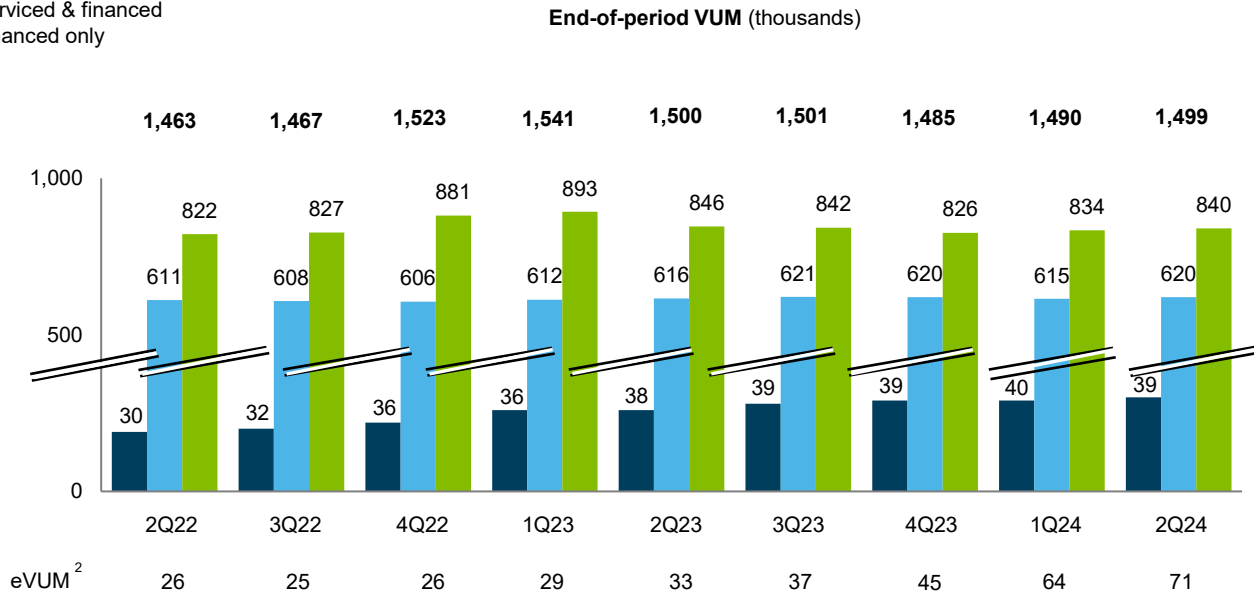

OPERATIONAL HIGHLIGHTS

1.2.1 Vehicles Under Management (VUM)

Every "VUM" is one unique vehicle (a) receiving or subscribed to one or more Element services, and/or (b) financed by Element, whether or not subsequently syndicated. The vast majority of the decline in VUM from 2Q23 through 1Q24 was due to our ending the provision of white-label services to competitors.¹ These were largely low margin and one service only VUM and, as such, contributed immaterially to our financial results.

- Serviced only
- Serviced & financed
- Financed only

1. Reductions in VUM of 73,800 in 2Q23, 68,000 in 3Q23, 33,000 in 4Q23 and 31,400 in 1Q24 (in aggregate 206,200 VUM) were as a result of our move to end the provision of white-label services to competitors.

2. Electric vehicles under management (eVUM) consists of battery electric, plug-in hybrid, and hybrid electric vehicles.

1.2.1 Vehicles Under Management (VUM) (Cont'd) – U.S. and Canada only

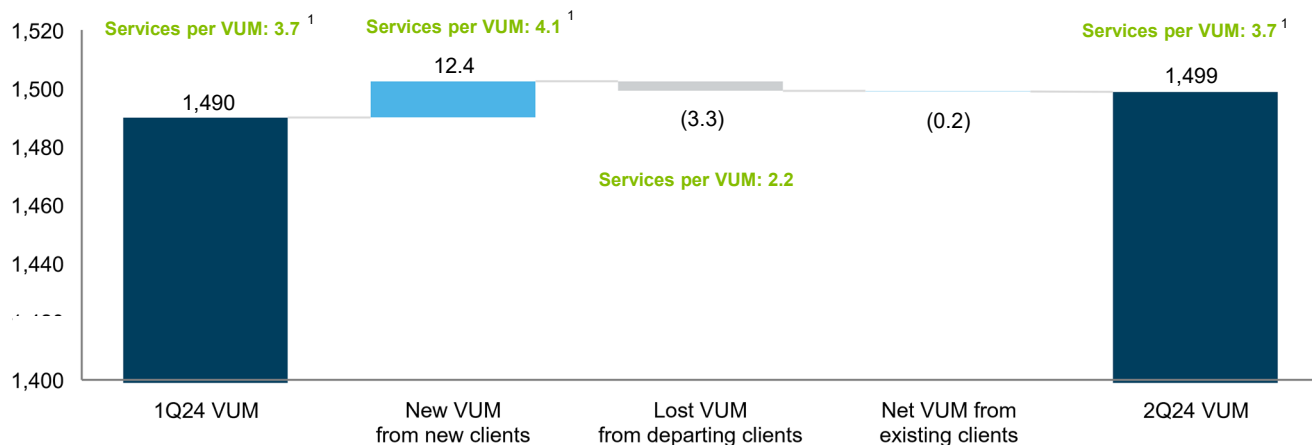

Share-of-Wallet (SoW) growth – selling incremental services to existing clients – is one of the drivers of Element's profitable net revenue growth strategy. As illustrated below, we are both (a) making progress on SoW growth and (b) still in a position to reap benefit from further SoW growth. Across our fleet in the U.S. and Canada where the vast majority of our vehicles operate, we have increased the percentage of multi-service VUM over the past year from 73% to 80%. Moreover, less than 17% of our fleet are subscribed to more than 6 services, leaving ample room for further penetration across all geographies.

- Multi-service VUM
- Single-service VUM

1.2.2 1Q24 -> 2Q24 End-of-period VUM waterfall

Quarter-over-quarter, we onboarded new client vehicles with higher service attachment rates – and, therefore, a more compelling near-term services revenue profile – than the vehicles we are offboarding. In addition, we are focused on providing more services to our existing client base. The waterfall below represents the number of services per VUM in our U.S. and Canada fleet only where the vast majority of our vehicles operate.

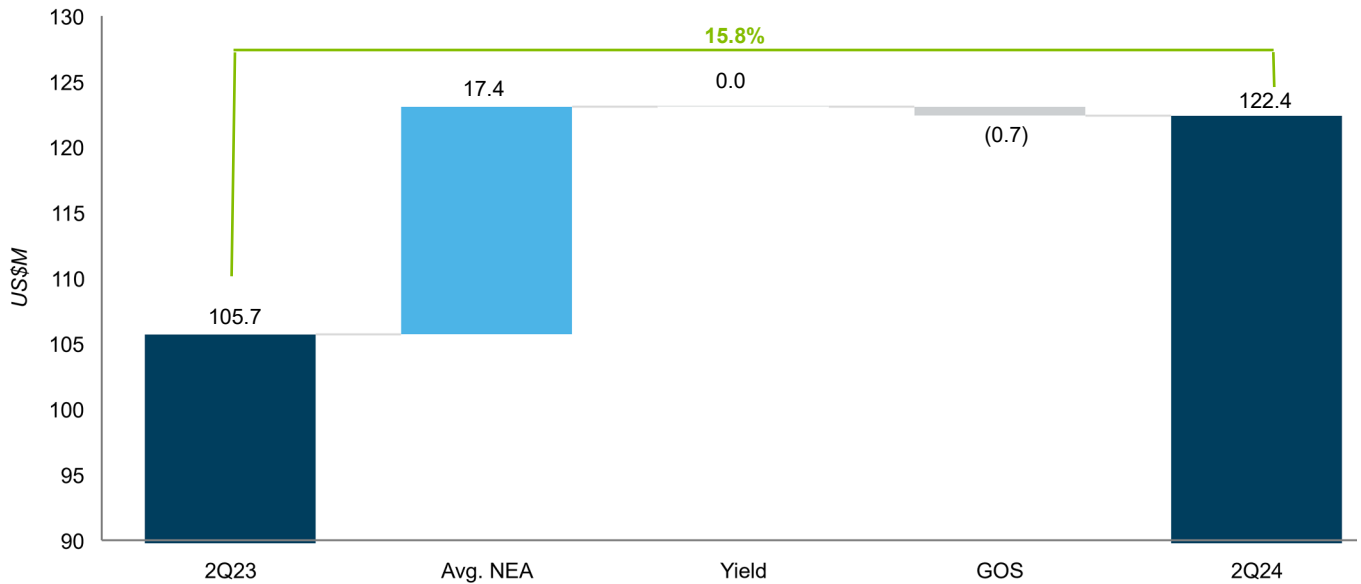

1. U.S. and Canada only. Services being tracked include Collision, Fleet Partnership Solutions, Fuel, Insurance, Maintenance & Roadside Assistance, Tax Benefits, Telematics, Title & Registration and Tolls & Violations. Excludes Acquisitions, Remarketing, Driver Safety and End of Contract services. Commencing Q1 2024 the Company excludes Financing from its total services count (previously included in total services count).

OPERATIONAL HIGHLIGHTS

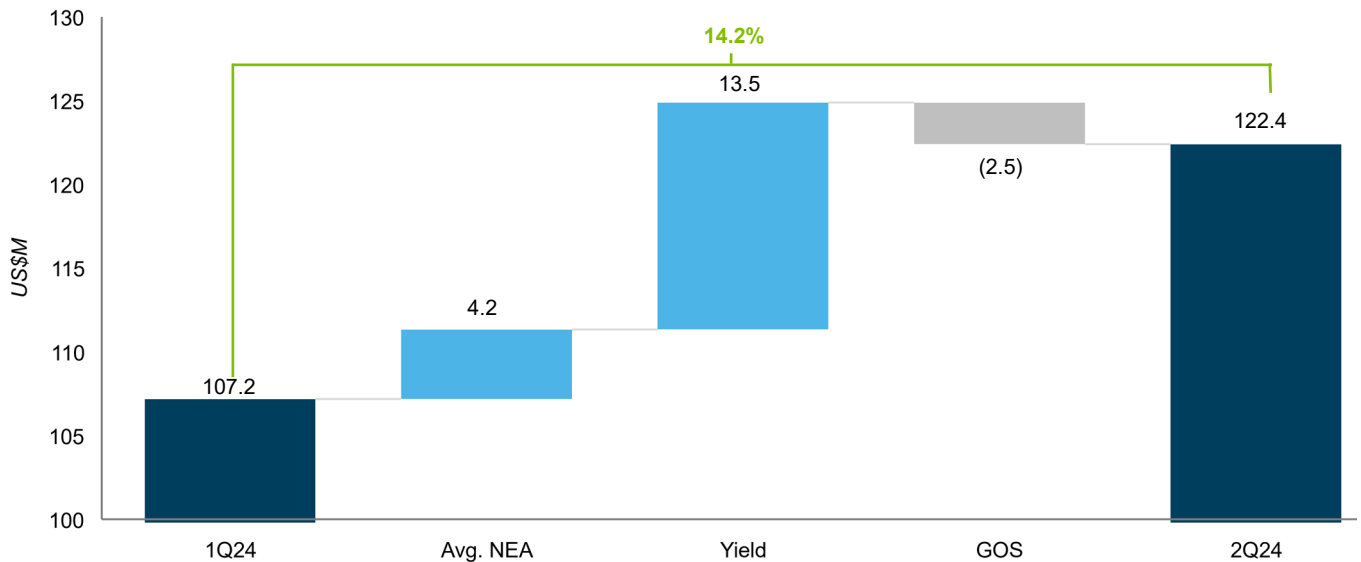

1.3.1 2Q23 -> 2Q24 net financing revenue waterfall

Q2 2024 net financing revenue grew \$16.7 million or 15.8% from Q2 2023.

1.3.2 1Q24 -> 2Q24 net financing revenue waterfall

Q2 2024 net financing revenue grew \$15.2 million or 14.2% from Q1 2024.

Profitable net revenue growth

PROFITABLE NET REVENUE GROWTH

2.1 Net revenue growth

Q2 2024 net revenue grew 14.1% from Q2 2023. The chart below highlights that our year-over-year net revenue growth has been accelerating over the last two years.

2.2 Adjusted operating income growth and LTM adjusted operating margin expansion

Q2 2024 adjusted operating income (AOI) grew 15.2% year-over-year. Adjusted operating margin for the last 12 months (LTM AOI margin) rose by 170 basis points year-over-year (YoY) and 10 basis points quarter-over-quarter (QoQ).

A capital-lighter business model

A CAPITAL-LIGHTER BUSINESS MODEL

3.1 Driving value for shareholders by growing capital-lighter revenue

Element continues to advance its capital-lighter business model that focuses on growing high recurring and higher margin services revenue and strategically syndicating assets, both of which improve the Company's return on equity. Services revenue has much lower funding needs than net financing revenue – only the net working capital required to procure fuel, parts and services for clients – making services revenue highly accretive to return on equity.

We earn varying degrees of services revenue in different geographies, and the nature of that services revenue (usage-based versus recurring) varies by geography. The following pie charts represent our revenue composition by geography and the breakdown of usage-based vs. recurring services revenue at Q2 2024.

A CAPITAL-LIGHTER BUSINESS MODEL

3.2.1 2Q23 -> 2Q24 services revenue waterfall

Q2 2024 services revenue grew \$13.7 million or 10.8% from Q2 2023.

3.2.2 1Q24 -> 2Q24 services revenue waterfall

Q2 2024 services revenue decreased \$6.9 million or 4.7% from Q1 2024.

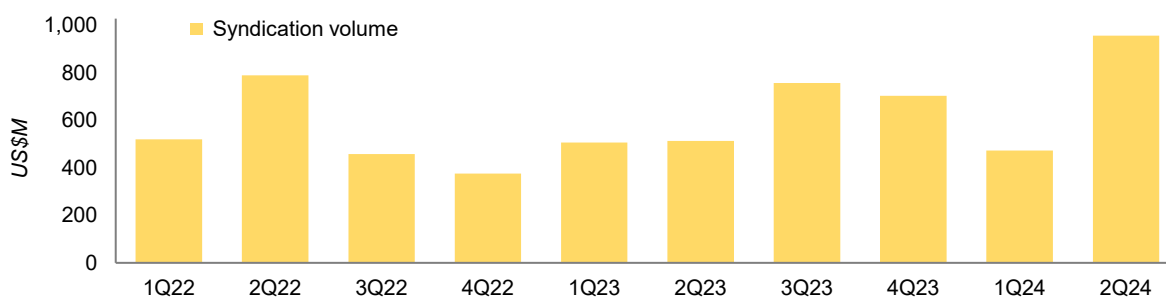

1. Includes \$7.0 million in certain items not likely to recur in 2024. Excluding these amounts, Q1 2024 services revenue was \$140.1 million.

A CAPITAL-LIGHTER BUSINESS MODEL

3.3 Capital-lighter services revenue, syndication revenue, and pre-tax return on common equity

The second pillar of our capital-lighter business model is syndication: the sale of fleet lease receivables, on a non-recourse basis, to financial buyers with a lower cost of capital than Element's, on terms that are economically superior for Element versus holding those assets on balance sheet. The syndication market demand for Element's assets remains robust, affording the Company ready access to this off-balance-sheet source of cost-effective funding. In 2Q24, we syndicated a record \$955.2 million in assets driven by our continued focus on our capital lighter business model.

The growth of services revenue and our syndication program advance our capital-lighter business model, which continues to enhance ROE. Adjusted pre-tax return on common equity of 19.6% in 2Q24 improved 140 basis points year-over-year.

Definition

pROcE The sum of (before-tax adjusted operating income, minus preferred share dividends) for each of the current and three preceding quarters; divided by (average total equity for the current quarter and same-quarter prior year, minus current quarter preferred share capital).

Sustaining capital investments are a portion of Element's total capital investments, which are disclosed quarterly in our Financial Statements - Statement of Cash Flows section, line items "Purchase of property, equipment and leasehold improvements" and "Purchase of intangible assets, including computer software".

GROWING FREE CASH FLOW PER SHARE AND RETURNING CAPITAL TO SHAREHOLDERS

4.2 Return of capital

We return capital to our shareholders through growing common dividends (see section 4.3 below), common share buybacks (section 4.4 below) and preferred share series redemptions. We allocate capital to these return 'levers' based on required investments in our business, tangible leverage ratio management, and free cash flow per share performance. Our target tangible leverage ratio range is 6.25x-6.75x. From time to time, we may temporarily exceed this target range in advancing our strategic priorities. We also have one remaining upcoming planned preferred share redemption in September 2024 (US\$92.4 million).

4.3 Common dividends (in CAD)

On August 13, 2024, the Company's Board authorized and declared a quarterly dividend of C\$0.12 per outstanding common share of Element for the third quarter of 2024. Currently, our annual common dividend target payout range is 25% to 35% of the Company's last twelve months' (LTM) free cash flow (FCF) per share.

1. Element's inaugural NCIB ran from November 10, 2020 to November 9, 2021.

2. Element's second NCIB ran from November 15, 2021 to November 14, 2022.

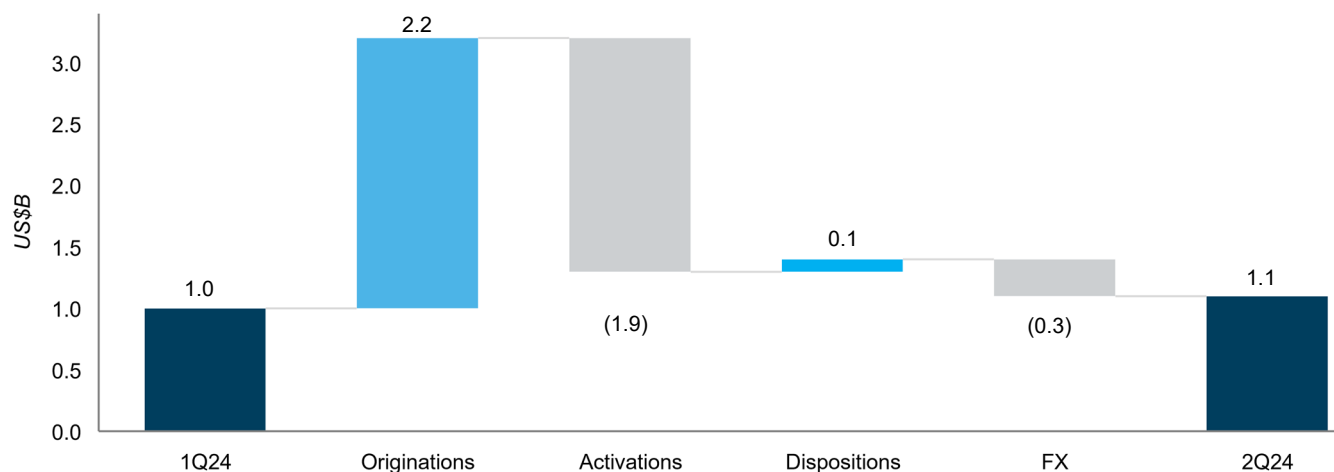

3. Element's third NCIB ran from November 15, 2022 to November 14, 2023. In 4Q23, we purchased 153,473 Common Shares for cancellation for an aggregate amount of C\$3.0 million at a volume weighted average price of C\$19.56.

4. Element's current NCIB will run from November 15, 2023 to November 14, 2024.
