

Simplifying your EV journey

Arc by Element™ provides end-to-end EV services and solutions designed to simplify every aspect of fleet electrification.

Our team of experts will:

- Design and support EV pilot programs and full EV deployments
- Strategize the right fit-for-use vehicle and finance the transition
- Connect you to our broad network of EV-specialized providers (including maintenance, collision and other services)
- Build out essential EV charging solutions and infrastructure
- Identify relevant public and private incentives available to you
- Provide training and support for drivers and management

We'll help you
confidently navigate
your path forward

representative or visit us at
elementfleet.com/arc

With Arc by Element™, you'll get tailored solutions for your fleet's specific needs.

EV PLANNING SERVICES

- EV fleet transition planning and roadmap development
- EV feasibility analysis and fit-for-use evaluation to identify the right EV models to replace your ICE vehicles
- Integrated public and private charging solution strategy and planning to optimize cost
- Custom pilot design to help you begin your electrification journey
- Evaluation of available public and private incentives
- Tailored vendor selection to meet your fleet needs
- Driver energy (kWh) reimbursement support for home-based charging
- ICE to EV driver education and change management

CHARGING SOLUTIONS

Home charging: A fixed, all-in-one, per driver/per month subscription fee charged to you, the client. It includes installation, hardware, software/connectivity, driver reimbursement reporting and Element support/reporting to simplify management of your home charging program.

Public charging: With key strategic partnerships, Element facilitates access to extensive EV charging roaming networks, and offers simplified and integrated billing to streamline your fuel and charging processes.

Depot and Workplace charging: Element helps you to identify depot and workplace sites well-suited for electrification and engage with our strategic partners to deploy customized financing, hardware and installation services. We also help you navigate the complexity of designing and rolling out this type of infrastructure.

END-TO-END EV FLEET MANAGEMENT

- Sustainability goal alignment
- EV pilot design and support
- EV and charger financing
- EV incentive support
- Vehicle acquisition
- Title & registration
- Home charging
- Public charging
