

Truck Maintenance

Maintenance management that delivers convenience and cost savings

When your trucks aren't on the road, they're not making money. We get it. That's why Element Fleet Management's comprehensive truck maintenance program delivers maintenance and repair assistance when and where you need it. The faster your trucks can get back up and running, the better.

Our maintenance program provides truck repair assistance of all types – preventative maintenance, unscheduled repairs, emergency roadside assistance, on-site and mobile maintenance. We've got you covered. Our trained technicians will help you manage repairs ensuring your trucks stay on the road and productive.

Comprehensive program combined with our unmatched buying power and actionable data for better analysis and decisions will keep your fleet well-tuned and your costs under control.

Reduce unscheduled downtime, improve performance, control costs and simplify asset management.

Truck Maintenance

Keeping your trucks on the road

TRUCK MAINTENANCE SERVICES

At the core of our maintenance programs

- Large, North American repair footprint with more than 12,000 tractor and trailer repair facilities in our network
- Contracted network ensures quality repairs and service at competitive pricing
- Ability to service all asset types, including trucks, trailers, refrigerated equipment, forklifts
- Preventive maintenance (PM) schedules and due/overdue reporting increases OEM warranty and DOT compliance
- Downtime tracking of assets and reporting of cost savings
- Unprecedented visibility to maintenance approvals, trends and repair history
- Vendor payment processing, centralized billing includes summary of maintenance expenses

EMERGENCY ROADSIDE ASSISTANCE

24/7 nationwide towing and roadside repair network with fast dispatch service

- Trained staff with knowledge of fleet transportation emergency response and logistics
- Specialists to handle risk mitigation and incident management
- Specialized recovery ability for high value cargo, rail impacts and off-terrain

DEDICATED ON-SITE MAINTENANCE

Maintenance managed and performed at your facilities

- Managing our customer's on-site repair facilities including all labor, administrative support, tools and equipment with certified technicians

- On time preventative maintenance (PM) completions, repairs and safety inspections helping to reduce downtime

MOBILE MAINTENANCE

Dedicated fleet maintenance where and when you need it

- Fully customized rolling garages deployed when and where you need them reducing downtime
- Certified technicians perform preventative maintenance and majority of truck repairs where your vehicles are located reducing transport time, hassle and fuel costs

MANAGED MAINTENANCE CALL CENTER

Repair oversight and recommendations

- 24/7 call center staff review and negotiate maintenance transactions on your behalf
- Over card limit repair requests are negotiated by an ASE-certified truck technical advisor
- Non-safety repair requests are declined and escalated if needed

MANAGED MAINTENANCE PREMIUM

Dedicated maintenance advisor assigned to your fleet

- Dedicated advisor to help develop and execute a PM strategy for your fleet
- PM activity is monitored and branch managers proactively notified of due and overdue PM's
- Ongoing training conducted for branch locations to promote program utilization
