

Element Xcelerate™ for Drivers

Driver vehicle management made easy and convenient

Xcelerate for Drivers makes it easy for your drivers to tackle fleet tasks quickly and efficiently, whenever and wherever. With a responsive website and mobile native applications, keeping up on managing their company vehicle has never been simpler or more convenient. Xcelerate for Drivers provides a proactive to-do list for common vehicle-related tasks such as mileage reporting, service card information, preventive maintenance alerts and reminders, location-aware maintenance shop and fuel locators, as well as a smart dial feature for fast access to Element’s call center specialists.

For more information, contact your Element account manager or visit elementfleet.com

XCELERATE FOR DRIVERS

Website and mobile applications

Drivers can tackle fleet tasks quickly and efficiently

- Personal use reporting and trip logging to optimize driver performance and improve compliance
- Place new vehicle orders and check status (web only)
- Preventive maintenance notifications recommend the best shop to do the repair based on service required and vehicle location
- A proactive to-do list for common vehicle-related tasks

Self-service tools that provide instant access to key information

- View vehicle and service card information and company policy documents
- Report lost or stolen service cards and retrieve PIN numbers (U.S. only, policy dependent)
- Contact Us features that allow for web submission or smart dialing
- Schedule windshield repairs with Safelite Auto Glass directly through Xcelerate for Drivers (U.S. only)
- Schedule maintenance and repairs directly with Firestone and Tires Plus stores (U.S. only)
- Recall notifications help drivers find nearby, in-network dealerships to service the recall

Intuitive and simplified design to ensure an optimized driver experience

- With integrated fingerprint identification, there's no repeated sign-in required, giving drivers quick, secure access
- Location aware Find Services feature assists drivers in locating the lowest price fuel, nearest service providers and provides turn-by-turn directions via the users preferred mobile navigation tool
