Proven Safety Technologies

According to the top testing agencies, the following safety features deliver the most proven results.

Talk with your account team to learn how Element experts can help you meet your fleet safety goals.

- **TIRE PRESSURE MONITOR**
  Warning that one or more tires is underinflated

- **FORWARD COLLISION WARNING**
  Audible alert that a hazard is detected ahead

- **BLIND SPOT DETECTION**
  Uses a symbol, sound or vibration to alert driver to vehicle in blind spots

- **LANE DEPARTURE WARNING**
  Alert that vehicle is drifting over lane markings and to take corrective action

- **ADAPTIVE CRUISE CONTROL**
  Speeds up or slows down vehicle to maintain a set following distance

- **EMERGENCY BRAKE ASSIST**
  System recognizes sudden braking by driver and adds additional pressure

- **ADAPTIVE HEADLIGHTS**
  Headlights move side to side as steering wheel turns for increased visibility

- **REARVIEW CAMERA**
  Displays wide view behind vehicle while in reverse

- **OBSTACLE DETECTION**
  Uses bumper-mounted sensors to determine distance to nearby objects
